Research Interests

Distributed System, Blockchain, Network & Machine Learning

Education

Shanghai Jiao Tong University

Bachelor of Engineering, Computer Science, ACM class

Advisor: [Yong Yu](#)

Shanghai, China

September 2015 - June 2019 (expected)

- ACM Class is a highly selective class (**top 5%**) in the Department of Computer Science and Engineering.
- GPA: **overall: 91.11/100 (3.94/4.3) | major: 93.75/100 (4.10/4.3) | ranking: 3rd/24.**
- TOEFL: **108** (R30, L28, S22, W28).

Massachusetts Institute of Technology

Visiting Student, Electrical Engineering and Computer Science Department

Advisors: [Joshua B.Tenenbaum](#)

Cambridge, MA, USA

July 2018 - January 2019

Publications

Modeling Parts, Structure, and System Dynamics via Predictive Learning

Zhenjia Xu*, Zhijian Liu*, Chen Sun, Kevin P. Murphy, William T. Freeman, Joshua B.Tenenbaum, and Jiajun Wu
International Conference on Learning Representations (**ICLR**) 2019.

Research Experiences

Massachusetts Institute of Technology

Research Intern, Computer Science & Artificial Intelligence Lab

Advisors: [Joshua B.Tenenbaum](#) and [Shuran Song](#) (incoming Professor at Columbia University).

Cambridge, MA, USA

July 2018 - present

○ Modeling Parts, Structure, and System Dynamics via Predictive Learning

Objective: Parts recognition, hierarchical structure decomposition, and future prediction.

- Proposed a novel formulation that learns to recognize and segment each object and its parts, build their hierarchical structure, and capture their motion distribution with a generative model, which can be further utilized for future prediction and video synthesis.
- Evaluated our PSD model on both real and synthetic datasets, and our model works well on all three tasks: segmentation, building the hierarchical structure, and future prediction.
- Submitted a paper to *International Conference on Learning Representations (ICLR)* 2019.

○ Robot Learning of Physical Object Properties

Objective: Self-supervised learning of physical property representation via interaction.

- Built a simulator for testing models and implemented two primitive actions: push and collide.
- Proposed a novel recurrent model to encourage the learning of physical properties. The representation can be used for further application.
- Achieved good performance on both on both simulator and real robot, especially the great generalization ability when encountering new objects.
- In progress. Prepare to submit to *Robotics: Science and Systems (RSS)* 2019.

Cornell University Ithaca, NY, USA
June 2018 - July 2018
Remote Collaboration, Systems and Networking Group
Advisor: [Robbert van Renesse](#).

o **Consensus Protocol Design and Implementation**

Objective: A system for maintaining decentralized, authenticated data structures.

- *Charlotte* addresses the fundamental shortcoming of traditional blockchains: scalability and efficiency.
- Proposed and implemented a novel permissionless consensus protocol with *Charlotte*. The experiment result proves that *Charlotte* can reduce overhead effectively when the network scale becomes large.
- In progress. Prepare to submit to *IEEE Symposium on Security and Privacy (Oakland)* 2020.

Shanghai Jiao Tong University Shanghai, China
July 2017 - June 2018
Research Intern, Apex lab
Advisors: [Yong Yu](#) and [Weinan Zhang](#).

o **IJCAI-18 Alimama Sponsored Search Conversion Rate (CVR) Prediction Contest**

Objective: Predict the conversion rate (CVR) in sponsored search.

- Proposed a flexible framework including feature extraction, CVR prediction, and model ensemble.
- Designed the whole pipeline, implemented the majority of feature extraction modules and tried several state-of-the-art recommendation models.

Course Projects

- o **Audio Event Recognition**, using deep learning to recognize audio. **97/100** [\[PDF\]](#)
- o **Text Classification & Item Recommendation**, using machine learning. **99/100** [\[PDF\]](#)[\[PDF\]](#)
- o **Mx Compiler**, translating a C-like language into x86-64, over **12,000** lines. **99/100** [\[GitHub\]](#)
- o **Advanced Data Structures** {Strict Fibonacci Heap, AAA Tree, PQ Tree}. **98/100** [\[GitHub\]](#)

Honors and Awards

Scholarships.....

- o **National Scholarship** (highest honor for undergraduates, **top 0.2%** in China). 2016, 2017
- o **Rongchang Scholarship** (**top 1%** over 17,000 students in SJTU). 2016
- o **Zhiyuan Honorary Scholarship** (**top 5%** over 17,000 students in SJTU). 2016, 2017

Programming Contests.....

- o **Second Runner-up** (**3rd over 150** teams) in ACM-ICPC Regional Contest, Beijing Site. 2016
- o **Second Runner-up** (**3rd over 120** teams) in Chinese Collegiate Programming Contest. 2016
- o **Gold Medal** (**top 5% over 200** teams) in ACM-ICPC China Final. 2016
- o **Gold Medal** (**top 7% over 150** teams) in ACM-ICPC Regional Contest, Beijing Site. 2015
- o **Silver Medal** (**top 0.1% over 70,000** participants) in National Olympiad in Informatics. 2014

Mathematical Contest in Modeling.....

- o **Meritorious Winner** (**top 10%**) in Mathematical Contest in Modeling. 2017

Teaching Experiences

- o **Teaching Assistant** of Data Structure (*MS105*). 2017
- o **Assistant Coach** of SJTU ACM-ICPC Team. 2017 - 2018

Technical Strengths

Programming Languages: C/C++, Python, Java, Pascal, JavaScript, MATLAB.

Toolkits / Software: Torch, Pytorch, Tensorflow, MXNet, Pybullet.
